ABSTRACT

Idioms are an intrinsic part of human communication. Learning idioms is certainly not a piece of cake (very easy), sometimes you will be all at sea (totally confused). Traditionally, teaching and learning idioms was considered as a hard nut to crack (difficult to understand). Moreover, a pin-drop silence (complete silence) is maintained in teaching and learning idioms. The present study investigates the strategies, problems and difficulties the second year students at Intermediate encounter while learning idioms. A questionnaire was administered on ninety eight subjects. The results demonstrated that a majority of the sample displayed a major difficulties they encounter and strategies they adopt in learning and using idioms. Implications as well as suggestions for further research were portrayed.

KEYWORDS
Culture; figurative language; human communication; Idiomatic expressions; L2 learners; positive attitude.
