ABSTRACT :

The meaning is still, unmoved with the inner realization of the self, a super consciousness state. We cry but we do not know who cries and suffers within us. 'A' is the first Word which came into existence. All the signifiers ultimately lead us to the only one signified, i.e. the Absolute, the Truth. All interpretations, discourses and negotiations take us to the one signified. Although these ideas seem to be unbelievable and impossible as it is transcendental, beyond the human perception and intelligence. But still it needs to be experienced rather than simply felt. Nothing can be proved logically, practically and intellectually. All

contradictory meanings take us to more interpretations. Every human discourse takes us away from the Absolute. That's why we often argue, discuss and re-interpret the things. What comes first is the question of inquiry, the inquiry into the self. At the centre of a holy person's body there is a sacred place in the form of lotus. Someone lives in it in the lotus. That is nothing but the Truth, Atma, the Soul, or the Absolute.
