University of Technology and Applied Science,
Muscat, Oman.

ABSTRACT

Teaching methods are the broader techniques used to help students achieve learning outcomes, while activities are the different ways of implementing these methods. Teaching methods help students: master the content of the course. learn how to apply the content in particular contexts. Learning science develops knowledge, problem solving skills, boosts critical thinking, cultivates a passion for learning, uplifts many disciplines, and holds the key to

future and technology. Science also involves a lot of communication with other people and develops patience and perseverance in children. Different teaching methods like lecture method, demonstration method, inductive–deductive method, heuristic method, problem solving method, project method, etc., are used for presentation of the subject matter to the students.
